

DAVID HORINEK | SERIAL ENTREPRENEUR

Longevity, Reimagined

INFRARED AND
BEYOND

Presented by David Horinek

Continuous Innovation

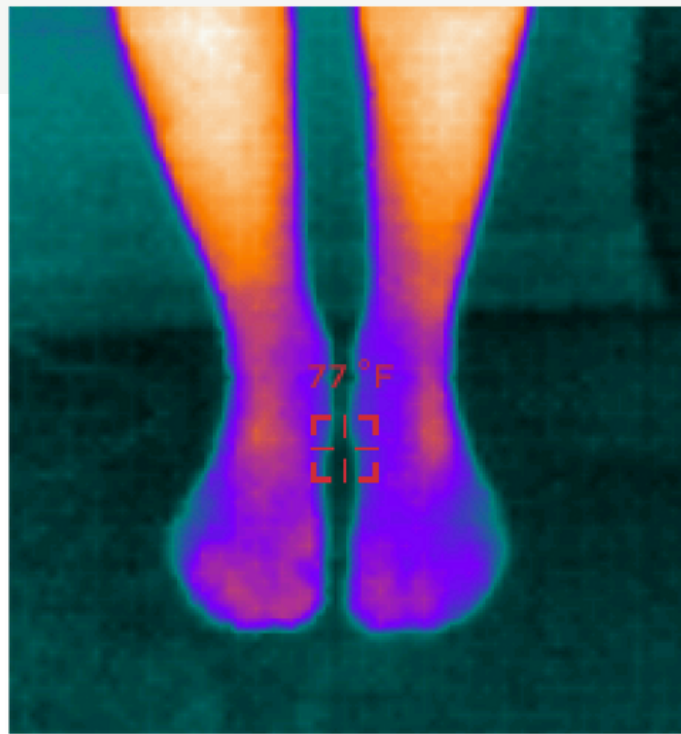

It all started in 1991 with the Invention of Celliant.

Celliant is the first mineral enhanced textile that has been recognized by the FDA as a Class 1 Medical device designed to improve micro-circulation.

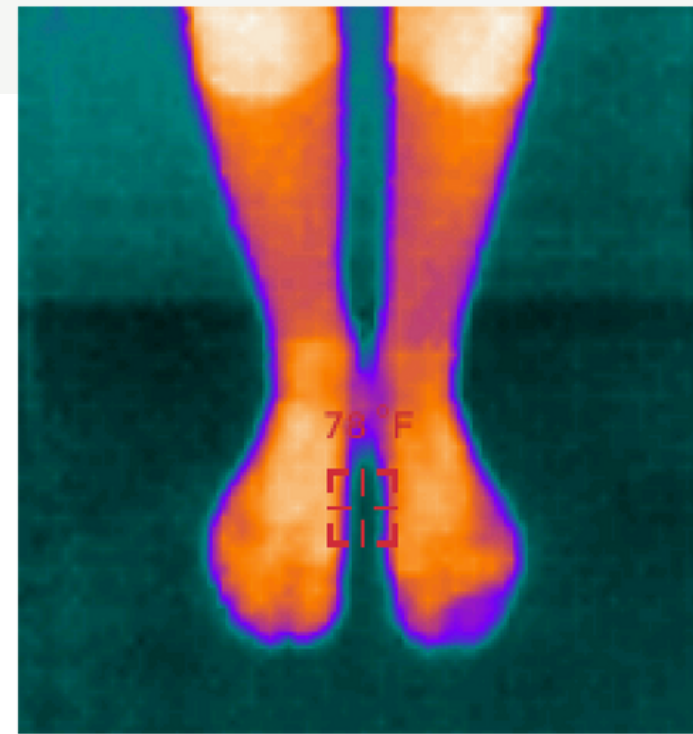

The game changing textile was just the beginning. We create better ways to live longer lives by using natural minerals that interact with our bodies to keep us at homeostasis.

INFRACYCLE™

Control

InfraCycle™

Harnessing the body's own natural energy, Infrared minerals embedded permanently in yarns and fibers are a proven vasodilator that increases oxygen levels in the body, enhances cell vitality and regulates body temperature.

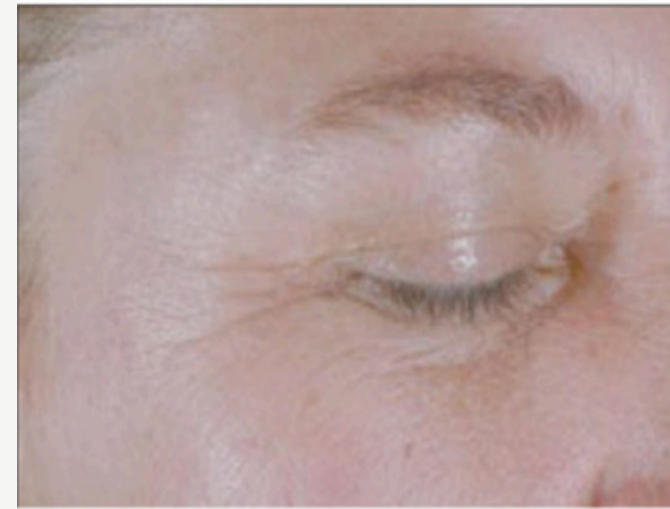

Infrared Garments can help maintain homeostasis in the body to keep you at a comfortable and even temperature.

Manipulating Light

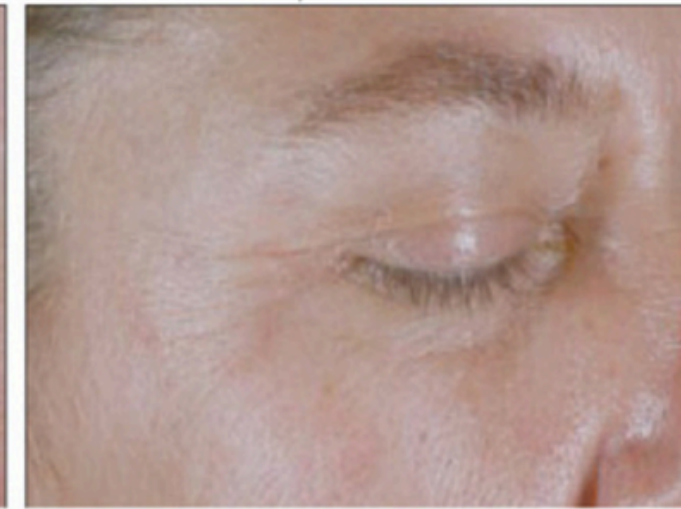

BioLumen shifts the way light hits our skin.

Taking plant based amino acids we are able to activate the body's own healing properties using specific wavelengths of light.

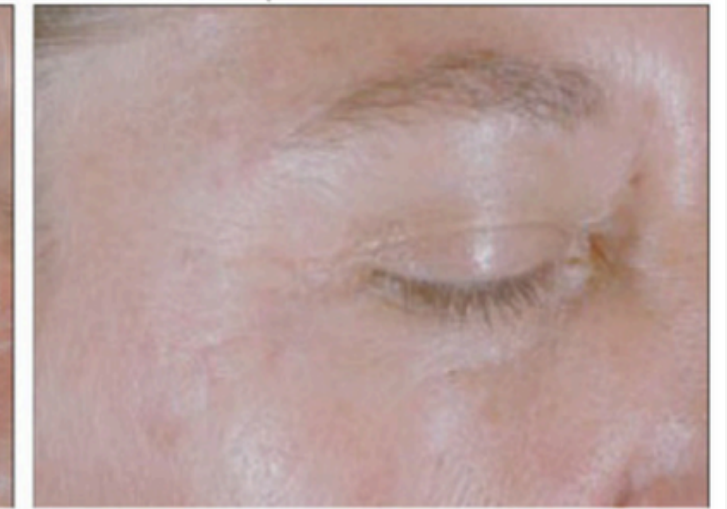

Start

After 30 Days

After 60 Days

HEATLOCK™

We took the lowest thermally conductive minerals on the periodic table and permanently embedded them in fibers to create a new and improved insulation.

Designed to be lighter and warmer, HeatLock textiles uses the body's own heat to maintain a sustained warm environment.

GARMENT	CLO VALUE
Thin Sweater	0.20
Thick Sweater	0.35
Long Sleeve Thick Turtleneck	0.37
Vest	0.13
Light Summer Jacket	0.25
Jacket	0.35
Down Jacket	0.55
HeatLock Fleece	0.55
Coat	0.60
Parka	0.70

Zinc Oxide Enhanced Textiles

Our Zinc based products provide the highest quality protection from broad spectrum UV rays while acting as a powerful antibacterial and antifungal agent.

Technology Comparison

Benefitis	ecoUV/ecoZinc	Silver	PHMB	Zinc Pyrithione	Silver Chloride	Titanium Dioxide
UV Protection *	X *					X *
Inhibits Growth of Odor Causing Bacteria	X	X	X	X	X	
Antifungal Properties	X	X	X	X	X	
Reduced Fiber Degredation	X					
GRAS Certified **	X					

* ecoUV/ecoZinc provides all UV-A and UV-B protection while Titanium Dioxide only provides Partial UV-A and UV-B protection.

** GRAS is Generally Recognized as Safe under Sections 201(s) and 409 of the Federal Food, Drug and Cosmetic Art.

THE FUTURE SPACE AGE TEXTILES

Longevity for humans means longevity for the planet and its' resources. As we develop new ways to help humans live fuller, more vibrant lives.

Heading into the future, our goals will be to continue to source and develop the highest quality and most effective products, all while standing on a platform of sustainability.

Anti-Aging Textiles

Miron Glass

Special dark violet glass helps increase vibrational frequencies, protecting the products within to slow degradation.

Imagine the same thing happening to your cells.

By imbedding this micron sized glass particle into yarns, we are able to create an environment for your cells to live longer.

Life Extension Textiles

Pulsar

EMF RADIATION

The shocking truth is that EMF radiation has been shown to have terrible effects on the nervous system.

BLOCKING EMF RADIATION

Certain natural minerals have been shown to have profound benefits in block EMF radiation from affecting the nervous system.

FULLERENES

Containing a massive amount of fullerenes that have been known to reduce the negative effects of free radicals.

Environment Changing

BioSun

As our environment becomes warmer and it becomes unsafe for us to be in the sun for long, we must find alternative ways to provide our body with the nutrients it needs to survive.

By manipulating light, BioSun generates a rainbow of visible light around the body, triggering natural liver function to create usable vitamin D without sunlight.

The Future of Molecular Hydrogen

H2B

<https://h2boost.fit/>

H2B is a new biotechnology for whole body wellness that provides the best delivery system available for molecular hydrogen, combating inflammation and oxidative stress.

It helps to:

- Support mitochondria
- Increase ATP Generation
- Lactic Acid Buffering
- Reduce Appetite
- Restore Cellular Health
